# School Report.

The number of scholars registered in our schools for the year is eighty-three.

Number of children enumerated by the Truant Officer between the ages of five and fifteen, ninety.

One of our schools has continued under the direction of the same faithful and efficient teacher who has taught it for several successive terms, winning the approbation of parents, pupils and School Board. In the other schools it was deemed expedient to secure new teachers, and the marked improvement in deportment and consequent progress in study have been highly satisfactory results. We are pleased to note a higher per cent. of attendance in all our schools than last year, yet it is not up to the standard that it should be. Teachers are usually interested to inculcate habits of punctuality, but when parents fail to see the evil, and are wanting in interest as to whether their children improve their advantages or not, it is plain to see where the blame lies. We are pleased to note the large number of visitors registered, but the small proportion of parents among the names calls for the annual admonition to visit the schools instead of finding fault unjustly.
